PROFESSIONAL EXPERIENCE

Software Developer Intern

Sep. 2025 – Apr. 2026

MDremit

Edmonton, AB

- Designed, built, tested, and released features end to end for an early-stage medical billing platform using React, TypeScript, and Node.js, owning physician and clinic staff workflows from concept through production support.
- Integrated third-party billing and AI APIs, including GPT-4, behind validation and error-handling layers, delivering a secure claim submission workflow projected to reduce manual review effort by 15%.
- Designed and consumed REST APIs to build reliable integrations and maintain accurate data flows between internal services and external platforms.
- Collaborated with non-technical stakeholders to translate complex regulatory and compliance requirements into scoped, testable deliverables.
- Utilized Github for version control and Github Actions CI/CD pipelines for automated builds, testing, and deployment.

Software Developer Intern

Sep. 2024 – Apr. 2025

Premier Stays

Edmonton, AB

- Delivered a Next.js and TypeScript booking platform across the full SDLC, from design and implementation through testing and release, replacing a third-party listing service.
- Built responsive UI components for listing search, filtering, and booking flows, writing clean, reusable, maintainable production code.
- Integrated the Google Maps API and AWS S3-backed media uploads to deliver new product capabilities in a cloud-hosted application.

Frontend Developer, Contract

Jan. 2024 – Apr. 2024

Ledcor

Edmonton, AB

- Built a searchable video tagging system with a team of four, validating behaviour across large data sets to confirm accurate, consistent results.
- Engaged client stakeholders through structured requirements meetings and translated business needs into clear, testable technical deliverables.

PROJECTS

Subscription Tracker | *TypeScript, Node.js, Go, Claude API, PostgreSQL, Redis, SwiftUI*

Apr. 2026 – Present

- Built an AI email-parsing engine in Go that scans a user's inbox and extracts recurring subscriptions through the Claude API, using schema-constrained tool calling and a keyword scoring pass that filters messages before the model is called.
- Designed the TypeScript and Node.js backend behind it, integrating Plaid for bank transaction sync, Google OAuth for inbox access, and JWT authentication, with PostgreSQL and Redis for storage and token caching.

MindfulScan | *React, TypeScript, Go, GPT-4 API*

Jan. 2024

- Built the React and TypeScript review interface for an AI content-moderation tool, surfacing flagged content and moderation status in a single view.
- Wired the frontend to a Go backend and the GPT-4 API, handling asynchronous requests, loading states, and errors across an end-to-end LLM workflow.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL, Java, C#, Swift, HTML5, CSS

Frameworks: React, Next.js, Node.js, SwiftUI

Databases: PostgreSQL, MySQL, MariaDB, MongoDB, Redis; query design, data modelling and validation

APIs and Integrations: REST API design, OAuth 2.0, JWT authentication, Plaid, Google Maps API

AI and LLMs: Claude API, OpenAI

Cloud and DevOps: AWS (S3, EC2, CloudFront), Google Cloud, Docker, Linux, Git, GitHub Actions CI/CD

Practices: Full SDLC ownership, automated testing, code review, documentation, production support, Agile

LANGUAGES

English (full professional proficiency), French (fluent)
