EDUCATION

Northern Alberta Institute of Technology
Bachelor of Applied Information Systems Technology

Edmonton, AB
Sep. 2022 – Apr. 2026

EXPERIENCE

Software Engineer Intern

Sep 2025 – Apr 2026

MDremit

Edmonton, AB

- Built backend services and REST APIs for a cloud-based medical billing platform, shipping features iteratively through agile and CI/CD with weekly code reviews
- Developed internal reporting systems to track claim submissions for supporting operational decision-making with reliable, up-to-date data.
- Translated complex regulatory and compliance requirements into clear process documentation, collaborating with non-technical stakeholders to align on outcomes.
- Integrated a third-party billing API to automate end-to-end claim submissions; monitored system health and debugged production issues using Grafana and Loki

Frontend Developer Capstone

Jan 2024 – Apr 2024

Ledcor

Edmonton, AB

- Engaged directly with client stakeholders through structured meetings to assess requirements and translate them into clear, functional deliverables.
- Developed a searchable video tagging and categorization system, demonstrating strong information management and data organization skills.
- Collaborated as part of a team to overcome technical challenges and deliver a high-quality product on schedule.

Sales Associate

Feb 2021 – May 2023

Under Armour

Edmonton, AB

- Delivered personalized, client-centered service in a high-volume environment, consistently assessing individual needs and connecting customers with appropriate options.
- Trained and mentored new team members on client engagement techniques and operational procedures, fostering a collaborative and supportive team environment.
- Maintained accurate inventory records and supported daily operational tracking, demonstrating attention to detail and organizational skills.
- Built strong rapport with clients to support ongoing engagement and trust.

PROJECTS

MindfulScan | *ReactJS, TypeScript, Go, GPT-4 API*

Jan. 2024

- Built an AI-powered content moderation automation during a hackathon; integrated GPT-4 to automatically identify and flag inappropriate content without manual review.
- Connected a Go backend with a React frontend, wiring the AI API into a functional end-to-end workflow with mock data demonstrating real-world automation logic.

Edmonton Business Directory | *Next.js, TypeScript, Google Maps API, AWS S3*

Apr. 2024 – Jun. 2024

- Volunteered to design and build a full-stack community business directory using Next.js and TypeScript, helping local businesses gain greater online outreach and visibility.
- Integrated Google Maps API with places autocomplete to enable accurate geolocation and searchability of listed businesses across Edmonton.
- Configured AWS S3 with proper permissions and security policies to securely handle business image and asset uploads from directory owners.

Premier Stays | *Next.js, TypeScript, Go, Google Maps API, AWS S3*

Jan. 2025 – Apr. 2025

- Collaborated with a team of four to revamp a third-party listing service, enabling direct property listings on the company's website.
- Integrated multiple external APIs and services (Google Maps, AWS S3) into a unified platform, connecting systems and automating data flow between them.
- Configured cloud storage with proper permissions and security policies; implemented dynamic pricing logic driven by live market data.

LANGUAGES

English: Full professional proficiency (spoken and written)
French: Fluent proficiency (spoken and written)

TECHNICAL SKILLS

Data & Reporting: SQL, Excel (pivot tables, dashboards, data visualization), Power BI (familiar)
Developer Tools: Git, Docker, Linux, AWS, Google Cloud, Microsoft Office Suite
Languages & Frameworks: TypeScript, JavaScript, Python, CSharp, SQL, Next.js, Node.js, .NET, React
