EDUCATION

Northern Alberta Institute of Technology
Bachelor of Applied Information Systems Technology

Edmonton, AB
Apr 2026

EXPERIENCE

Full-Stack Developer
MDremit

Dec. 2024 – Present
Edmonton, AB

- Designed and built features for a medical billing platform startup in their development phase using React, TypeScript, and Node.js, applying API-driven architecture and modern engineering practices, owning delivery end-to-end for physician and clinic staff workflows.
- Collaborated with stakeholders to translate complex regulatory and compliance requirements into scoped deliverables, aligning feature development with operational priorities.
- Integrated third-party billing and AI APIs (including GPT-4) with validation and error-handling layers, delivering a secure claim submission workflow that is set to reduce manual review effort by 15%.
- Utilized Git and CI/CD pipelines for automated builds, testing, and deployments, and instrumented the application with Grafana and Loki to trace defects to root cause.

Software Developer Intern
Premier Stays

Sep. 2023 – Aug. 2024
Edmonton, AB

- Supported project delivery across the Software Development Life Cycle, contributing to design, implementation, testing, and release of a Next.js and TypeScript booking platform that replaced a third-party listing service.
- Wrote maintainable, readable code with an emphasis on consistency and reuse, building responsive UI components for listing search, filtering, and booking flows.
- Collaborated on feature development and component enhancements, integrating the Google Maps API and AWS S3-backed media uploads to deliver new product capabilities.

PROJECTS

MindfulScan | *React, TypeScript, Go, GPT-4 API*

Jan. 2024

- Built the React and TypeScript frontend for an AI content-moderation tool during a hackathon, surfacing flagged content and moderation status in a single review view.
- Wired the interface to a Go backend and the GPT-4 API, handling asynchronous requests, loading states, and errors across an end-to-end workflow.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Golang, Java, Csharp, Python, HTML/CSS, Swift

Frameworks and Databases: React, NextJS, ExpressJs, PostgresSQL, MySQL, MongoDB, Redis, MariaDB, ASP.NET, Expo

Tools & Platforms: Git, Docker, AWS (S3, EC2), Google Cloud, Linux

CERTIFICATIONS & LANGUAGES

Certifications: AWS Certified Cloud Practitioner

Languages: English (full professional proficiency), French (fluent)
